

# IOANA C. PASCU

"I am a junior full-stack developer, and front-end enthusiast, with almost 3 years of project oriented experience as a student worker, and more recently as a full time employee. I am driven to further develop my skills and gain new knowledge on the way."

## EXPERIENCE

- Full-stack developer for Simplyture  
2100 Copenhagen Ø  
Sep. 2019 - Present

As my first full time job experience I have had the opportunity to learn more in depth about full stack programming by refactoring the administration system from Coldfusion to .NET core. Hence, I have strengthened my front-end abilities and most notably, Javascript, but also improved on middleware and back-end.

- Student full-stack developer for Plan2Learn  
8260, Viby J  
Jun. 2018- Sep. 2019

While working as a student for Plan2Learn, my responsibility within the development team was to be in close contact with the UX team while refactoring the learning modules using new(ish) frameworks such as KnockoutJS and .Net core, also migrating to Bootstrap 4.

- Intern for Plan2Learn  
8260, Viby J  
Feb. 2018- Jun. 2018

As an intern, I had the opportunity to apply the knowledge accumulated during the first semesters as a student, but solidify them with "on the field" work by getting familiar with EntityFramework and KnockoutJS.

- Erasmus junior web developer for HighContrast  
Brașov, Romania  
Jun. 2017- Dec. 2017

My ErasmusPlus experience have consisted of developing internal mobile and web applications in Angular3 and Angular4.

## EDUCATION

- Bachelor of Engineering in Information and Communication Technology  
VIA University College  
8700, Horsens  
Aug. 2015 - Jun. 2019

- Liceul cu Program Sportiv  
Brăila, Romania  
Sep. 2003 - Jun. 2015
